

NICHQ is committed to achieving equity in all forms, including race, nationality, gender identity, sexual orientation, and ability. As our equity work grows, our project portfolio continues to be a reflection of our dedication to ensuring every child reaches their optimal health.

 *details project's specific equity focus*

equity

Equity Systems Continuum

In response to the impact of systemic racism and other forms of oppression on maternal and child health outcomes, this

project aims to create tools for equitable change within both organizations and systems.

 *Develops NICHQ's social justice and anti-racism platform and elevates partnerships with thought leaders in health and racial equity*

maternal and infant health

Content Development for Newborn Screening Clearinghouse

NICHQ is managing all content for a new comprehensive web-based clearinghouse

to raise awareness about the importance of newborn screening and help families navigate the screening process. In partnership with content expert Genetic Alliance, NICHQ is facilitating the development of up-to-date and state-specific web-content about newborn screening and its life-saving potential.

Funded by the Health Resources and Services Administration Maternal and Child Health Bureau.

National Network of Perinatal Quality Collaboratives

NICHQ serves as the coordinating center and provides expertise to state-based perinatal quality collaboratives with the goal of deepening and accelerating improvement efforts for maternal and infant health outcomes. Funded by the Centers for Disease Control and Prevention.

 *Uses quality improvement methods integrated with a health equity approach to impact populations disproportionately affected by adverse perinatal outcomes*

New York State Maternal and Child Health Collaboratives

NICHQ is supporting the New York State Department of Health's (NYSDOH) New York State Perinatal Quality Collaborative (NYSPQC) in their efforts to provide the best, safest and most equitable care to people in the perinatal period and their infants. This is achieved through the development and implementation of promising interventions in New York State birthing facilities. Funded by the NYSDOH.

New York State Birth Equity Improvement Project

NICHQ is supporting the NYSPQC in their empowerment of birthing facilities to: identify how individual and systemic racism impacts birth outcomes at their organizations; and take action to improve both the experience of care and perinatal outcomes for Black birthing people in the communities they serve.

 *Elevates NICHQ's commitment to address health equity targeting maternal mortality with a focus on racial disparities*

Quality Improvement Community of Learning

In partnership with the American College of Obstetricians and Gynecologists (ACOG) Alliance for Innovation on Maternal Health (AIM), NICHQ has developed a Quality Improvement Community of Learning (COL) to strengthen and support knowledge and understanding of Quality Improvement (QI) methodology. Funded by the Department of Health and Human Services, Health Resources and Services Administration's (HRSA) Alliance for Innovation on Maternal Health (AIM) program.

maternal and infant health

Sudden Unexpected Infant Death (SUID) Prevention Program

The purpose of this program is to reduce overall rates of SUID and reduce racial and ethnic disparities in SUID by supporting pediatric health care practitioners to provide evidence-based counseling and education to infant caregivers and families; to guide system improvements; and to identify and support policy changes that address state- and community-specific SUID risks. NICHQ collaborates with the American Academy of Pediatrics (AAP) on engaging a national collaborative to identify and promote community and state SUID prevention best practices. Funded by the Health Resources and Services Administration Maternal and Child Health Bureau through a subcontract with AAP.

 *Affirms NICHQ's dedication to programs designed to address health disparities*

Supporting Healthy Start Performance Project

NICHQ, in partnership with the National Healthy Start Association, is providing a comprehensive capacity-building assistance training program for 101 Healthy Start programs nationwide. The training program includes technical assistance on high-priority topics, such as safe sleep, fatherhood and breastfeeding, and training for program staff on core competencies. Funded by the Health Resources and Services Administration Maternal and Child Health Bureau.

 *Aims to reduce racial and ethnic differences in rates of infant deaths and negative maternal health outcomes*

UnitedHealthcare (UHC) Catalyst

NICHQ and UHC will implement a Proof-of-Concept project to demonstrate how a partnership between NICHQ, UHC, and Healthy Start can work with communities to address upstream issues that contribute to inequities in maternal and child health. By convening and coordinating the complementary initiatives of Healthy Start and UHC's Catalyst Center, this project will seek to demonstrate that aligning this work and leveraging resources can identify opportunities to accelerate progress toward equity by successfully identifying and addressing social needs among Healthy Start participants and increasing utilization of services. Funded by United Healthcare.

 *Uses collaboration to reduce inequities in rates of maternal and child health outcomes and advance successful equity initiatives*

special health care needs

Environmental Influences on Child Health Outcomes: Developmental Impact of NICU Exposures

In support of studying the long-term effects of environmental exposures on children who are treated in neonatal intensive care units, NICHQ provides project management and data management and analysis for participating clinical sites. Funded by the National Institutes of Health via the Children's Hospital at Montefiore/Albert Einstein College of Medicine and the Icahn School of Medicine at Mount Sinai.

Florida Children's Medical Services Learning and Action Network

By building the quality improvement capacity of specialty programs, this learning and action network will grow and support a high-quality system of care in Florida that serves all children and youth with special health care needs, regardless of insurance status and location. Funded by Florida Department of Health.

Hemoglobinopathies National Coordinating Center

NICHQ, with partner organization Abt Associates, is supporting a Hemoglobinopathies National Coordinating Center (HNCC) to help sickle cell disease (SCD) treatment demonstration program grantees – including community and federally qualified health centers – address structural and systemic barriers in their regions and implement evidence-based SCD care. The NICHQ and Abt Associates team are collaborating with organizations such as the Sickle Cell Disease Association of America to improve the quality of – and access to – care for SCD. Funded by the Health Resources and Services Administration Maternal and Child Health Bureau.

 *Addresses disparities in access and quality of care for populations most impacted by sickle cell disease*
